

While doing this she managed her own job, helped me out and still focused on collections. She is a star employee and she also collaborates and takes on extra work without complaining. The transition in Montréal was successful because of her and I am inspired by her every day.

Brittany Rosseel, Addiction Medicine Services, HHC

Brittany is a very active member of RTC. She works very hard at ensuring all AMS nursing staff is informed, given a voice, and finds common ground with all new and on-going RTC initiatives. She has driven change with handover, admission/discharge processes, etc., all of which have reduced time and risk to our patients and staff alike. Brittany is able to enlist other staff's help when undergoing a change process and the staff are willing partners due to her work ethic, creativity and 100% belief in the program itself and its benefits.
